make his hearers think that he has done so.

The process which he adopts is almost amusingly ingenuous. We have first a movement inscribed "Dawn." The quietude before sunrise is delineated by the device of a long-sustained single tone, which gradually spreads itself through the orchestra. The strings begin to murmur, flutes and oboes utter sounds like the calls of awakening birds and eventually the trombone proclaims a short phrase, which is, of course, the "Dawn motif," which gradually evolves into a broad song for the whole band.

Source of the Inspiration We are told that M. d'Indy drew his inspiration from the mountain region of Cevennes; he needed not to have gone so far. His colleague, Charpentier, had already produced the effect by reproducing the early matin sounds

A Satisfied Customer

We received a letter the other day from a man well up in the Railroad Administration. In speaking of Guaranteed Mort-gages he says:

Telephone Brackets

FOUNDED 1856

ARLY this season when we began featuring men's and young men's Winter suits and overcoats at fifty dollars, it became necessary to resort to a general revision throughout our entire price-range.

Constant replenishing of the variety at lower prices meant a gradual but steady paring down of prices all along the line.

In keeping down prices we have determined to keep up the variety-more to see, more to save.

What Dual Valves Add to Pierce-Arrow Trucks

UAL Valves add to Pierce-Arrow trucks increased power equal to any demand they may be called upon to meet. Hills, mires and rough-going will not worry them.

Power Avoids Road Delays

Power equal to any need saves delay. Trucks complete trips in less time; makes more trips, more money. The yield from a truck investment is fixed by the work it does.

Reduces Operating Costs

This increased power is developed at a lowered cost. Dual Valves mean fuller, purer gas charges. Two sparks assure complete combustion and convert the charge into more miles.

Decreases Repair Costs

Time lost in the shop is a big truck expense. Easy accessibility of parts assures repairs, when necessary, with the least loss of time, with the lowest labor charges.

THREE TRUCK SIZES:

2-ton, 31/2-ton and 5-ton-and a tractor -all electric lighted, worm driven, and equipped with Dual Valve engines.
